ENVIROMENTAL POLICY STATEMENT 2018

Water –Lines Solutions policy towards the environment is one of constant review and refinement to protect the future from the past and apply sound science for protection of today so as to benefit future generations and the ecosystem.

Our approach is based on 6 principles:

1. To strive always to use environmentally sound products.
2. To use wherever possible products in an environmentally friendly process.
3. To use products and applications that are energy saving and pollutant free.
4. To reduce waste wherever possible and recycle materials if possible.
5. Take a responsible attitude to educate others on the protection of contamination from the past with sound scientific products and applications from our experiences and to constantly strive to produce new products and processes to further that end.
6. To monitor suppliers for similar policies in order to advance our objectives.

Simon Jenkinson
Managing Director
